A Dangerous Targor.

Torpor or inactivity of the kidneys is seriously dan-
gerous to those organs, since it is the precursor of
diseases which destroy their substance and endanger
life. This sluggishness may be overcome by stimulat-
ing them, not excessively, but moderately, an effect
produced by Hostetter's Stomach Bitters, a general
stimulant and alterative possessing diuretic proper-
ties of no common order. The impetus which this ad-
mirable medicine gives to their excretory functions
counteracts any tendency to congestion which may
arise in their tissue. Both they and their associate
organ, the bladder, are invigorated as well as greatly
stimulated by the Bitters, which exerts a kindred in-
fluence upon the stomach, liver and bowels, and by
strengthening the system, enables it to withstand may
of epidemics, to which when exposed it might
otherwise succumb.
